

# Project in Visualization and Data Analysis

4DT911  
Jesper  
Samuel  
Emil

# Dataset 1

- Formula 1 Race Data (Kaggle) From Ergast Database
  - circuits.csv
  - constructor\_results.csv
  - constructor\_standings.csv
  - constructors.csv
  - driver\_standings.csv
  - drivers.csv
  - lap\_times.csv
  - pit\_stops.csv
  - qualifying.csv
  - races.csv
  - results.csv
  - seasons.csv
  - sprint\_results.csv
  - status.csv
- Drivers/constructors/races are linked by ID
- Has Data from 1950 - Now

# Dataset 2

- Formula 1 Fantasy data (2022 – Now)
  - Driver Prices
  - Constructor Prices
  - Points Matrix
- Using public API to get data

# Project Idea

- Formula 1 fantasy predictor
  - For Fantasy players
- Applicable to Sports Gambling

Some Ideas:

- Predicted Points
- Predicted Results
  - Team optimizer
- Comparison tools

Cost Cap: **\$3.2M**

Auto fill Continue

| Driver        | Cost    | Change   |
|---------------|---------|----------|
| M. VERSTAPPEN | \$27.5M | - \$0.1M |
| A. LINDBLAD   | \$7.8M  | - \$0.2M |
| F. COLAPINTO  | \$10.6M | - \$0.6M |
| O. BEARMAN    | \$7.0M  | - \$0.6M |
| G. BORTOLETO  | \$8.0M  | - \$0.2M |

| Team     | Cost    | Change   |
|----------|---------|----------|
| Mercedes | \$32.9M | - \$0.3M |
| Williams | \$13.2M | - \$0.2M |
